an INTERLINK[®] Health Company

LET US TAKE CARE OF YOU

Nurses
Available
24/7

About Us

CancerCARE is a support service offered to you at no cost as part of your health benefit plan. Oncology specific nurses are there to help plan your treatment, help maximize your benefits and answer cancer questions for health plan members. Services will start the moment you call to register after a cancer diagnosis. We will be here to help from diagnosis through survivorship.

Our Services

Medical

Before any treatment is given, a nurse carefully reviews the guidelines to ensure they're personalized to your genetic makeup, and once you're connected, they'll walk you through what to expect every step of the way.

Location

Our nurses prioritize keeping your treatment close to home but can connect you with a Center of Excellence when needed.

Availability

Nurses are available around the clock and will communicate using your preferred method—phone, email, text, or video—to ensure you feel supported at every step.

Why choose Us

Oncology nurses are available to assist patients in accessing financial aid programs and support services when needed.

One of our nurses will sit down with you to walk through the guidelines and break everything down in a way that's easy to understand.

Some diagnoses are more commonly misdiagnosed and a specialist pathologist is required. In those cases, we will send your pathology to a Center of Excellence for a second-opinion review.

Should your care plan involve a Center of Excellence, a nurse will assist with scheduling and travel coordination to ensure everything is arranged for you.
